Orson Welles, at a railway station, lectures the audience in truth and falsehood, in art, in films and in life.
A ragbag of an entertainment, cannibalizing as it does more than one unsold documentary, shredded at the editing table to match the narrator's illusionist style. The story of Edie Sedgwick, a young upper-class woman who starred in a handful of Andy Warhol's underground films before he dumped her. She died of a drug overdose at the age of 28.
A shallow, ill-conceived film about a young woman whose entire life was more style than substance. The problem with relating Edie Sedgwick's life is that while she looked striking, she achieved little: her equivalents today are reality TV contestants. Sienna Miller, making the best of a bad job, certainly looks the part, while Guy Pearce's quasi-autistic Warhol quietly steals the picture. Hayden Christensen's turn as a folk singer

clearly meant to represent Bob Dylan is literally laughable. These characters hanging around Warhol's Factory looked bored as a default expression, and it's difficult not to look bored right back at them.

The Falcon

A debonair solver of crime puzzles allegedly created by Michael Arlen but owing much to The Saint and resulting from a need by RKO for more of the same. Helped by a tough/comic manservant, he flourished during the forties in sixteen second features (the last three for Film Classics). After three episodes George Sanders tired of the role and was written out by being 'shot' and having his real-life brother Tom Conway take over as his fictional one. The performances of these two actors are pleasant, though the films are now fairly unwatchable, but John Calvert who took over for the last three was not a success.

A fascinating movie on urban life, with a protagonist who is both hero and villain. US 2000 75m CFI
Buena Vista/Walt Disney (Donald W. Ernst)

A long-awaited sequel, following the same format as the original, of animated sequences to classical music.

A disappointment, given a period of 60 years in which Disney's style of animation –heavy on cute and kitsch– seems hardly to have developed: the one sequence held over from the original Fantasia, Mickey Mouse as the sorcerer's apprentice, easily holds its own. The most successful new sequence, to Rhapsody in Blue, utilises the style of caricaturist Al Hirschfeld; perhaps the animators' imaginations might have been freed by a more adventurous choice of music.

Flags of our Fathers ** (8)

US 2006 131m
Warner Bros./Malpaso/Amblin (Clint Eastwood, Steven Spielberg)

The stories of the six men who raised the Stars and Stripes on the Japanese island of Iwo Jima. An iconic photo of this event becomes a sensation in America, and three surviving soldiers return home for a huge publicity tour to sell war bonds and restore public faith in the war effort.
On this film's release, there was surprise in many quarters that Eastwood, widely regarded as a conservative, would approach this story in anything but patriotic terms. Instead, much of the second half, back in the States, focuses on the cynical exercise in which three Iwo Jima veterans are used as stooges to whip up support for the war. Yet Eastwood has already made his patriotic case: the detailed, gory scenes depicting the taking of Iwo Jima are unsparingly real, and show exactly what heroism entails. They also explain why the three men are reluctant to embrace the fame being thrust upon them, or to be accepted as cheerful heroes to a public that could not appreciate the trauma of their experiences. A thoughtful, moving film that pays tribute to the fraternal impulses of fighting men.

JAMES BRADLEY: 'Heroes are something we create, something we need. It's a way for us to understand what is almost incomprehensible, how people could sacrifice so much for us.'
'Here, the feelings run very deep and as dark as dried blood, with Clint aware that some things don't need to be said and others shouldn't be shown.' – *Geoff Andrew, Time Out*
'*Flags of our Fathers* is touched by greatness. It argues that soldiers may go into battle for country and glory, but they always end up fighting for the survival of themselves and their comrades.' – *Peter Bradshaw, Guardian*
† The Japanese government refused permission for combat scenes to be shot on Iwo Jima itself, so they were filmed in an area of Iceland that also has beaches of black sand, owing to volcanic activity. Eastwood shot his companion film *Letters From Iwo Jima* (qv) back-to-back with *Flags of our Fathers.*

*A disappointment by the extraordinarily high standards Christopher Guest's skilled comedy troupe set themselves. Hollywood vanity is more familiar territory than their previous excursions -- into folk music (*A Mighty Wind, *qv*) and pedigree dog shows (Best in Show, *qv*). As a result, the material feels faintly stale. Some scenes from the truly terrible movie-within-a-movie, Home For Purim, are priceless, notably the Jewish family dinner. Yet crucially, no-one would ever deem Home for Purim award-worthy, a fact that enfeebles the satire.*

A retarded boy grows up to become an All-American footballer, a Vietnam hero, champion ping-pong player and a millionaire, while the woman he loves finds that her progress is mostly downhill.
A slick comedy as simple-minded as its hero, worth watching for the clever manner in which it slots Gump into the same historical frame as Kennedy, Johnson and Nixon. He remains a blank on which an audience can project any feelings it chooses, while the film's opprobrium is vented on the less conservative values represented by the woman he loves, whose fate is a lingering death. The movie's point is obscure, unless it is to suggest that you have to be an idiot to believe in the American dream, and its success took even its makers by surprise.

A glamorous but unhappy Russian wife of a wealthy, boorish Memphis music producer looks for warmth and understanding from her stepson.

Exquisitely subtle, moody character study, with an apparently blank uninteresting Russian trophy wife emerging as a heartbreaking character. Three intersecting stories, set in the 15th and 26th centuries and the present day, in which a man searches for a fountain-of-youth elixir that will save his dying wife.

Boldly ambitious to the point of foolhardiness, The Fountain *requires not merely the suspension of cynicism, but critical faculties too. Jackman, who appears in almost every scene, as a conquistador, a modern-day scientist and a time traveller to the future, works extraordinarily hard, but to no avail. The ponderous atmosphere and utter lack of humour make it hard to maintain a straight face. And alarmingly, the film's 26th century landscape recalls Roger Dean's 1970s album covers for 1970s progressive rock groups such as Yes. Clint Mansell's excellent score is a small consolation.*

'The particular magic of the film is the way in which it draws credible characters in a recognizable setting but elevates them and their story into crowd-pleasing fare without losing sight of the big social picture.' – *Derek Elley, Variety*

'The fault of the film is not that it deals in wishful thinking but that its style of wishful thinking – assertive, benignly narcissistic, dedicated to overcoming fear – is imported, a graft job. The people in the film would be much more likely to see success as a form of class betrayal and defeat than as a badge of solidarity.' – *Adam Mars-Jones, Independent*

† The film cost $3.5m and grossed $35m in the US, and another $132m elsewhere. It was, briefly, the biggest-grossing film at the British box-office, and is now second only to *Titanic*.
†† Two origins are given for the title phrase. 'Monty' was the nickname given to Field Marshal Montgomery. The Full Monty is either slang to describe the three-piece suits provided to soldiers on demobilization at the end of the Second World War, or to the Field Marshal's insistence on being served with a full English breakfast on the battlefield.

In Boston, a young female graduate spends the summer drifting between dead-end jobs to pay the rent, trying out ill-advised relationships and writing lists of things that will make her life better.
A throwback to how American indie films used to be in the 1990s, before they all started looking like calling cards for studio employment. Yet its primary influence, John Cassavetes, goes back 40 years or more. Director Bujalski, using a non-professional cast and amateur crew, shoots on 16mm, with a script that feels at least partly improvised. His characters – young, anxious and commitment-phobic --are tentative, inarticulate and frequently exasperating. Yet for all this, the film feels fresh and amusing. The life of the young Indian advocate who became a revolutionary, a saint and a martyr.

A straightforward treatment with the odd twists and turns expected of this director; but the remarkable things about the film are first, that it was made at all in an age which regards inspirational epics as very old hat; and secondly, that it has brought into life so splendid a leading performance. When, after ruling for two generations, the Mafia's New York head dies of old age, his son takes over reluctantly but later learns how to kill.

It is here, in the ruined face of such a man, that *The Godfather Part III* locates an emotional gravity rare in American movies. Conceived as a tribute to such 1940s classics as Casablanca *(qv) and* The Maltese Falcon *(qv), Soderbergh shot the film using back projections, boom mikes, and vintage lenses on a single camera, thus re-creating shooting conditions of that period. As a formal exercise in style, it's impressive, but fatally Attanasio's script fails to measure up. Each of the story's three acts is introduced by a different character – the morally confused Jake, the innocent-looking but vicious Tully and femme fatale Lena – and its emotional centre is hard to locate. It may look gorgeous, all dark, expressionistic shadows in Berlin's dramatic post-war rubble; but the actors look faintly lost, and (unlike* Casablanca*) it's hard to care about or engage with any of them.*

Edward Wilson, a Yale graduate, enters the intelligence business during World War II and stays with the CIA through the early days of the Cold War right up to the Bay of Pigs incident, aimed at toppling Fidel Castro.
A remarkably assiduous and detailed film with a director, Robert de Niro, who knows how to hold his nerve: in this story of an untrustworthy profession, he has made no concessions to making any character particularly likable. Indeed, its 'hero', Edward Wilson, is closed-off, unemotional and unknowable: the perfect CIA operative. Matt Damon plays Wilson with almost heroic restraint. It can be argued that much of the film is about the unglamorous, unexciting side of espionage: men sitting around at desks, trying to break codes or analyse intelligence. That this is also realistic does not make the film more enjoyable in the conventional sense. But it's a masterful achievement, a riveting insight into a world that civilians might prefer to know little about.

Grow Your Own ★★ (4)

UK 2007 97m
Pathe/Warp Films/Art in Action (Luke Alkin, Carl Hunter, Barry Ryan)

Tensions simmer on a Liverpool allotment when refugee families are offered plots of land to grow their own produce.

Well-intentioned, heartfelt story about an important issue: how easy it is to regard refugees and asylum seekers as an undifferentiated mass, rather than as individuals who can bring enormous talents to an adopted country, as well as a history of pain and victimhood. Benedict Wong is affecting as a Chinese father, the victim of land grabs in his own country, rendered mute by a past trauma. The film's determination to sugar the pill of this difficult topic sometimes undermines it; its comic tone occasionally sits uncomfortably beside the serious issues.

A teacher in an inner-city high school has a heroin habit – a fact discovered but kept secret by one of his pupils, a 13 year old girl. He tries to protect her from unseemly influences in her life out of school, and they strike up a cautious friendship.
It's a thinly disguised battle of wills over the future of an adolescent girl between two improbable saviours, but the writing and characterisation are so strong that the story never feels reduced to such a bald formula. Instead, the script is full of intriguing grace notes; Dan's ambivalence about growing up, Drey's wisdom that often gives way to her child-like qualities; and the pact between the two, which in context seems oddly believable. And it's rare that one sees an actor inhabit a role as meticulously as Gosling does here.

In Antarctica, where fish stocks are decreasing, a penguin chick named Mumble is born. He cannot sing, unlike the rest of his peers, but to their embarrassment is a talented tap-dancer. He sets out to find out why the penguins' food is vanishing, is captured and placed in a zoo, where his dancing makes him a sensation.

Technically a work of true brilliance, pushing CGI animation beyond all previous boundaries, and simulating the look of a live-action epic. Some scenes (an avalanche, Mumble throwing himself off a high cliff) are dizzyingly well executed. But what a strange stew this story is. A one-world message is bolted on, which makes it odd that Mumble's parents are representations of all-American icons, Elvis and Marilyn. And the right-on, eco-friendly subplot about Mumble helping to save the penguins' declining food supply feels terribly forced. Still, overall it's clever, funny and enjoyable.

Deliriously silly, over-the-top action thriller, not helped by the poor subtitling (as in: 'Drop that pistol, and let us fight it bear-handed' and 'Many people have bet less but they want it to loss well'); the movie lacks both a coherent narrative and John Woo's panache in its scenes of indiscriminate slaughter, as hostages and bystanders are mown down without compunction.

The Hardy Family

America's favourite fictional characters just before and during World War II were the family of a small-town judge, who seemed to personify all that everyone was fighting for, especially as the young son was always getting into amusing scrapes. Designed by a delighted MGM as low-budgeters, they paid for many an expensive failure, and introduced, as young Andy's girlfriends, a series of starlets who went on to much bigger things. The basic family was Lewis Stone, Fay Holden, Mickey Rooney, Cecilia Parker and Sara Haden (as the spinster aunt); but in the very first episode Lionel Barrymore and Spring Byington played the judge and his wife. MGM was given a special Academy Award in 1942 'for representing the American Way of Life' in the films.

Harry is threatened with expulsion from Hogwarts, and must still face the possibility of the evil Voldemort returning to cause malign mischief.
The fifth film in the series marks time, after the advances in tone and storytelling verve of the previous two. This is the densest and most complex of Rowling's books to date, and more detail has necessarily been jettisoned in favour of keeping the narrative moving along. So have many supporting characters, typically played by British acting stalwarts, whose contribution is whittled down to the odd line or two. Daniel Radcliffe now plays Harry as an intense, moody, angst-ridden teenager, and is given a romance with fellow Hogwarts pupil Cho Chang, which ends in a kiss. The enjoyable interplay between Harry, Hermione and Ron has also sadly been reduced. On the plus side, Imelda Staunton virtually steals the film as Professor Dolores Umbridge, the tyrannical new authority figure at Hogwarts. Still, the dark, edgy tone remains intact, and one now expects few new surprises from this hugely successful franchise.

A Vietnamese peasant woman endures hardships and torment from both sides in the war, and life is slow to improve after she goes to America as the wife of a US marine.
An ambitious and epic film, but too strident to be successful and one that, although ostensibly dealing with the life of a Vietnamese woman, still manages to make the subject-matter that of the American experience in Vietnam and its aftermath; the balance shifts from the moment Tommy Lee Jones's damaged marine enters the picture.

In a north of England grammar school in 1983, two teachers with wildly different styles help eight sixth-formers prepare for their Oxbridge exams.

Alan Bennett's moving but often uproarious meditation on the uses of education was a huge stage hit in London and New York, but is adapted for the big screen somewhat uncinematically – most scenes stay within the school's walls. Fortunately its waspishly brilliant script saves it. Griffiths is the loveable, flawed older teacher who advocates a love of learning for his own sake, and is not above groping his students on his motor-bike on the way home – a fact they accept with sophisticated, eye-rolling resignation. Irwin, a young, cynical careerist, urges his charges to espouse eye-catching contrarian views in their exam papers, and thus rise above the herd. Standout performances from the adult actors, and a real sense of enjoyment from wit from the young ensemble playing the boys. Better dialogue than this is rarely heard in cinema.

A down-at-heel private eye tries to establish whether the death by gunshot of George Reeves, who played Superman on TV, was suicide, or the result of shady studio politics.

Inconclusive and overlong, this is two stories bolted together – one broadly real, the other fictional and unsatisfactory. Hopalong Cassidy

Cassidy, a creation of Clarence E. Mulford, was a fictitious gentleman cowboy who oddly enough wore black; 26 books about him were published between 1912 and 1956 when Mulford died. 66 films were made starring William Boyd as Hoppy, with either George Gabby Hayes or Andy Clyde as comic sidekick: Harry Sherman produced them, first for Paramount and then for UA, and they were later edited down for TV, in which medium Boyd became a folk hero and eventually made a further series. The films were easy-going, slow-moving second features which always pointed an admirable moral for children; their main directors were Howard Bretherton, Nate Watt, Lesley Selander and George Archainbaud.
